

Incubator Basics

| Sun | Mon | Tues | Wed | Thur | Fri | Sat |
|----------------------|---|-----------------------|---|------|-----|--|
| 1 99.5F 50% RH | 2 | 3 | 4 | 5 | 6 | 7  |
| 8 | 9 | 10 | 11 | 12 | 13 | 14  |
| 15 | 16  | 17 65% – 75% RH | 18  | 19 | 20 | 21 Hatch Day!  |

Pip: First crack in the shell – can hear chirping
 Zip: Systematic cracks to open top – can see breathing
 Once hatched, leave in until dry and fluffy

How Hot?

| Week | Fahrenheit | Celsius |
|--------|------------|---------|
| Week 1 | 95° | 35° |
| Week 2 | 90° | 32° |
| Week 3 | 85° | 29° |
| Week 4 | 80° | 27° |
| Week 5 | 75° | 24° |
| Week 6 | 70° | 21° |
| Week 7 | 65° | 18° |
| Week 8 | 60° | 16° |

Start letting them out in a cage during day when afternoon temperature is equal to brooder temperature.
 Move them to coop when overnight temperature is close to brooder temperature.
